

## **YORLAB® AUTOPSY SAW** **Model No.: YSL / YSI-173**

### Specifications:

- The YORLAB Autopsy Saw is an essential instrument for Pathologists. High speed oscillating action quickly cuts through bone without harming soft tissue. Therefore exposure to infected tissue is reduced and there is no need for a blade guard.
- The saw may be used for removing the skull cap, making linear cuts or taking small bone specimens.
- It is durable and easy to handle.

### Salient Features:

- Accept all styles of autopsy blades.
- Complete with large section blade plus 2 arbors.
- Based on high-speed oscillation principle.
- 8-10 feet long electrical cord with hospital grade plug.
- On/Off sliding switches design.

- Hard piece to have firm grip area.
- Safety flange over hand piece.

## **YORLAB® AUTOPSY BOX** **Model No.: YSL / YSI-174AB**
