

YORLAB® WASTE SHREDDER (NEW) **Model No.: YSL / YSU-612**

Specifications:

- Purpose : Equipment is designed to shred plastic waste like blood bags, IV / blood transfusion sets, barrels/pistons of disposable plastic syringes, scalpel blades, needles, glass etc in hospitals.

Construction :

- These are fabricated of heavy duty frame with powder coated M.S. sheet. Equipment design permits easy & safe loading of material through sturdy hopper and the collection of shredded material in containers to avoid spill over, which in turn prevents any particles or aerosols from scattering as this process takes place in a closed system.

Cutter :

- These are made of non corrosive alloy steel of appropriate size and are designed to the latest technology for longer life and higher output.

Power Supply :

- Suitable to work on 220 V/440V, Single/Three Phase, 50 Hz. AC supply.

Salient Features :

- Movement of cutter in forward & reverse direction to avoid clogging of material.
- Easy & safe to operate.
- Low noise level.
- Heavy & sturdy construction.
- Non corrosive cutter.
- Easy to clean & maintain.
- Shock proof & insulated as per safety norms.
- Motor overload protection.
- Optional Accessories :
- Run time hour meter.

- Auto switch off against electrical accidents and overloading/jamming of cutting.
- Automatic shut down for idle running.

Other Equipment Available for a complete Waste Management Solution

Waste Transfer System

- Waste transfer trolleys
- Trolley wash machine of different size & capacity
- Garbage chute system

Waste Collection

- Waste storage equipment

Available in Following Capacity:

- 10 Kg.
- 20 Kg.
- 30 Kg.
- 40 Kg.
- 50 Kg.
